cardconnect™

The CardConnect Gateway delivers an omni-commerce payment solution that connects your business to any of the major credit card processing networks.

HOW IT WORKS

Designed to integrate all of your various payment acceptance methods— from swipe terminals and mobile readers to our Ajax Tokenizer and virtual terminal—the CardConnect Gateway offers one centralized, secure solution.

The CardConnect Gateway connects to FirstData, Vantiv, Bank of America Merchant Services, Elavon, Chase Paymentech, and many others so it's easy to integrate if you choose to maintain your current processor.

REPORTING & RECONCILIATION

The CardConnect Gateway collects vital business data like settlements, deposits, and statements all in one place. Our customizable reconciliation solution ensures reconciling cash-to-receipts is integrated and automated.

DEVELOPER FRIENDLY

APIs for SOAP and REST accommodate PHP, JSON/JavaScript and Java are user-friendly and easy to understand. Integrate CardConnect Gateway into virtually any proprietary application or third-party business system (including Oracle and SAP).

IMPENETRABLE SECURITY

Integrate your business environment to CardConnect Gateway and know that our patented tokenizer is protecting your customers' sensitive information from breaches and takes your applications out of PCI Compliance scope.

Integrate effortlessly to the CardConnect Gateway and receive CardSecure™ protection.
