

Start accepting credit cards, debit cards and electronic payments with CardConnect. Give your customers more ways to pay and watch your business grow.

HOW IT WORKS

Credit Card Processing with CardConnect lets your business accept more ways to get paid. Process all major card brands including Visa, MasterCard, Discover, and American Express, as well as ACH payments. Funds are automatically deposited into your bank account so you no longer have to wait for checks to clear.

BEST-IN-CLASS SECURITY

Payments are processed through our patented CardSecure technology so sensitive card data will never reside on your system. CardSecure moves all of your customer data to our secure vault, where it is encrypted and tokenized. By securing sensitive data this way, we protect your business from breaches.

INTERCHANGE MANAGEMENT

CardConnect aggressively manages interchange rates for our customers so you'll receive the lowest possible rate on every transaction. Our focus is on maximizing your bottom line.

PCI COMPLIANCE

CardSecure stores sensitive data in our Vault, keeping it out of your system and keeping your business out of PCI scope. We help you stay PCI-certified while avoiding a lengthy PCI audit.

Let your business accept all major card brands and enjoy the unrivaled features of CardConnect.
