

Secure Player Data

Casinos most valuable asset is player data. *Protect it with patented tokenization technology from CardConnect.*

Tokenization for Personally Identifiable Info - PII

CardConnect delivers an easy-to-integrate security solution that tokenizes sensitive information at the point of entry. Player data is converted to randomly generated tokens, making them impossible to decrypt.

Player Data - "The Holy Grail of Gaming"

VIPs and players want to know their personal information is safe. Why not use the same technology Fortune 500 companies trust to protect their bank card data?
